

Perspirometer & Incubator

For textile testing laboratories where accuracy and reliability are key, the Incubator and Perspirometer from James Heal provide the ideal solution.

Perspirometer & Incubator

COLOUR FASTNESS & PHENOLIC YELLOWING TESTER

Used to determine colour fastness to perspiration, cold water, sea water and phenolic yellowing.

Technical Specification		
	IN30	IN55
Usable volume (litre)	32	53
Capacity	Up to 4 Perspirometers	Up to 8 Perspirometers
Internal Dimension	400 x 320 x 250mm (width x height x depth)	400 x 400 x 330mm (width x height x depth)
No. of shelves	1	1
Air circulation	Natural Convection	
Temperature range	Ambient + 5°C up to +80°C	
Temperature stability	0.1°C	
Temperature controller	Adaptive multi-functional digital PID microprocessor controller with high-definition TFT-colour display and integrated countdown timer	

KEY BENEFITS

INCUBATOR

- Temperature control at 37°C and 50°C, designed to hold relatively low temperatures within the specified tolerances
- Multi-functional controller with a high definition display, which can be set to English, Spanish, German and French
- Self-diagnostic fault analysis to keep oven running and performing well
- Includes a digital timer which is adjustable from 1 minute to 99 days
- Calibration certificate for +37°C
- A fully insulated stainless steel door with 2-point locking
- Celsius or Fahrenheit display
- Available as 30 litre and 55 litre capacity to suit testing needs

PERSPIROMETER

- Stainless steel frame for longevity
- Designed to maintain a uniform pressure on specimens as they are drying out in the oven
- Suitable for both colour fastness testing using acrylic separator plates, and phenolic yellowing testing using glass plates

- Supplied with calibration certificate for confidence in testing

PHENOLIC YELLOWING

- James Heal's Phenolic Yellowing Test Kit includes impregnated test papers, control fabrics and BHT-free film
- It is approved by many leading retailers including Marks & Spencers
- It is the original kit, based on a technique developed by Courtaulds in the UK

Standards
Colour Fastness to Perspiration, Water and Sea Water
ISO 105 E01 - Colour Fastness to Water
ISO 105 E02 - Colour Fastness to Sea Water
ISO 105 E04 - Colour Fastness to Perspiration
BS 1006: UK-TB - Colour Fastness to Shampooing of Textile Floor Coverings
BS 1006: UK-TJ - Colour Fastness to Water of Textiles Floor Coverings
AATCC 15 - Colour Fastness to Perspiration
AATCC 106 - Colour Fastness to Water: Sea
AATCC 107 - Colour Fastness to Water
Phenolic Yellowing
ISO 105-X18
M&S C20B
TESCO TM/137/01
